

# Melbourne Water Outlook 2019

Melbourne's water supplies are secure for the coming year.  
.....

Our current water storage level is

# 63.0%

at 29 November 2018

## Here's what you need to know

- Permanent Water Use Rules and Target 155 remain in place to ensure sensible water use.
- Continuing to use water wisely, and water from the Victorian Desalination Project are important to keep Melbourne's water supply secure.
- Per capita consumption for 2017-18 is steady at 161 litres per person per day, approximately 35 per cent lower than before the Millennium Drought.

## Did you know?

Residential customers are Melbourne's biggest water users and use approximately two and a half times more water than industry.
